Green Urbana

The moment you enter Urbana, your heart fills with joy at the sight of beautiful greenery all around. The landscaping team is making sincere efforts to maintain at their best

New Initiatives to make Urbana Greener

Island opposite to Club

The island opposite the Club is prominent one as residents of Tower 5-6-7 cross past it every day. So, are the walkers in the morning and evening.

As part of original landscaping plan, large trees were planted here by the Project team

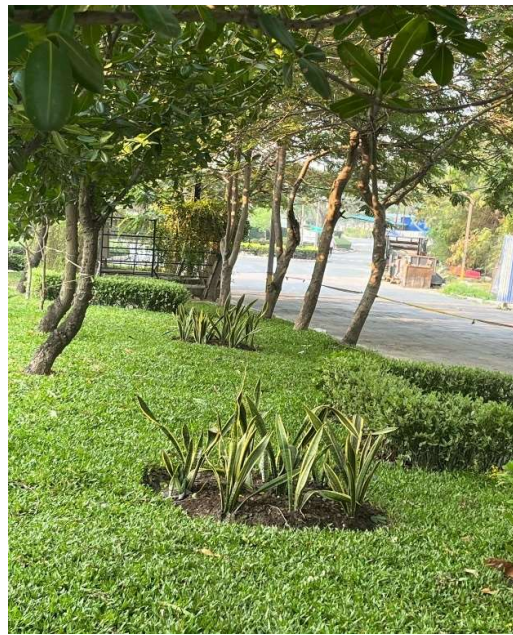

Therefore, enough direct sunlight does not reach the ground, so normal grass cannot survive here.

The ground was getting muddy during monsoon and looks bald during summer

NOW:

Blade Grass that can survive even in low sun light has been laid on the entire island to give eye-pleasing lush **Green** look.

East Avenue (from Tower 4 to Tower 5 – behind Central Lawn)

The area adjacent to Puja Mandap had exposed soil, looking ugly.

Now, covered with lush green Blade Grass carpet from the edge of platform to give a soothing look,

East side of the breeziest street at Urbana was looking bald, would turn slippery & muddy during monsoon.

The entire stretch till Bengal Gas station now covered with **Green** carpet (Blade Grass).

Regular Maintenance- Keeping Urbana Green

In hot summer, besides trimming/mowing, weeds removal, cleaning & removal of dry leaves, , regular watering is extremely essential to maintain greenery.
